Total Budget	
Description	To completely change the business model of the buildings, transforming itself into driver of a sustainable growth a strengthened social dialogue in the construction sector as the starting point for a strategy that places the reorganization of the production and the transition to a sustainable economy is needed. http://www.broadproject.eu/
Phases	n/a

Project Details	
Aim	A proposal of guidelines supporting social dialogue in the transition towards green building, for development of the labour market and growth, in the name of quality and respect for the rights, health and professional skills of workers was developed.
Target groups	Trade Unions, Research Centers and Employers Associations
Exchange of Experiences	A clear assumption of responsibility based on the will and the position of the various parties involved in the social dialogue
Outcomes 1	The adequate, informed and continuous involvement of the social partners at all stages of the processes of governance (definition, implementation, monitoring, evaluation and implementation of strategies
Outcomes 2	The establishment of a tripartite institution for social dialogue activities in the field of sustainable construction that guides and coordinates actions on European policies from consultation and dialogue between the various stakeholders (bottom-up approach) and not only on the basis of the issuing of European Directives (topdown
Outcomes 3	The provision of the resources necessary for the implementation of social dialogue on sustainable construction (human, financial, technical, knowledge-related...).
Outcomes 4	A proposal of guidelines supporting social dialogue in the transition towards green building, for development of the labour market and growth, in the name of quality and respect for the rights, health and professional skills of workers was developed.
