Policy/Initiative Data	
Title of Initiative	MOBI3CON - Developing Mobile 3D Data Collection, Processing and Dissemination Solution for Construction SME-s
Partnership details	Coordinator - Eesti Innovatsiooni Instituut Partner - FIEC
Project Duration	01.01.2009 to 31.12.2011
Total Budget	€ 2,225,770.80
Description	This FP7 project was established to create a mobile device, capable of containing 3D site plans and other relevant information, to help site managers and other site personnel on the job. The device would eliminate the need for paper site plans and would also enable the uploading of information direct to a server, to enable site personnel to instantly update critical data. The device would be portable, convenient and user friendly, used for data gathering, processing and visualisation. http://www.mobi3con.com
Phases	n/a

Project Details	
Aim	Allow construction site personnel to be constantly updated with the latest critical data on the job and to overcome the gap between the actual situation on site and three-dimensional (3D) information stored in the construction stakeholders' databases
Target groups	Construction companies, construction workers / site managers
Exchange of Experiences	
Outcomes 1	To bridge these gaps between the requirements of the users of existing 3D solutions and their cost and actual capabilities
Outcomes 2	enable 3D navigation in buildings and enable interaction with generally accepted engineering software tools.
Outcomes 3	support the growth of construction industry SMEs through the developed solutions.
Policy/Initiative	
Skill gaps	n/a
Mis-matching of skills	n/a
Skills-Shortages	n/a
Training	n/a
Career moves	n/a
Mobility	n/a
Other EQF-Level	n/a
Transfer in Europe	The consortium is continuing the software development through new projects at BBRI and in the SME partners own product development
Entrepreneurship Opportunities	Partners have started future projects and this has allowed them to begin entering to the new markets on construction sector.
Other	The SME-AG partners are continuing to promote ICT usage in the construction sector and they have now bigger confidence on understanding of the fundamentals of the ICT implementation and the challenges new technologies will bring.
