

SKILLS BLUEPRINT FOR THE CONSTRUCTION INDUSTRY: (ALL.CONSTRUCTION)

OBJECTIVES

The Blueprint for the Construction is developing a new sectorial strategic approach to cooperate on skills in the construction industry, and support a better matching between skill needs of companies and skills provided by training centres.

The Sectoral Skills Strategy will build on lessons learned from other initiatives (i.e. Build Up Skills) and will be based on a holistic approach, identifying political, economic, social, technological, legal and environmental factors, which may be affecting sector skills and training offers.

The Blueprint outcome will be deployed by involving main market players (Education-Business-Government-Cultural/civil society) taking up opportunities to make the best of their talents.

EXPECTED RESULTS

- Collect good practices at national and regional level to illustrate and promote other initiatives addressing skill gaps.
- Design and deliver a MOOC (Massive Open Online Course) to raise awareness among construction workers about new skills drivers: digitalisation, energy efficiency and circular economy.
- Create a Big Data observatory to provide valuable information about particular skill needs at regional/national level.
- Carry out an outreach campaign for the construction industry to promote its attractiveness among youngsters and women, identifying and promoting solutions to facilitate mobility of construction workers in Europe.
- Create a new virtual tool (SSA Portal) where all project outputs will be available for stakeholders, as well as a Sector Skills Alliance platform for collaborative work.

IMPACT

Currently, companies are facing difficulties in hiring qualified workforce to respond to new challenges in the construction industry, particularly those related to energy efficiency, digitalisation and circular economy. Thus, the targeted impact of the Blueprint in the sector will be the reduction of the gap between the training demand and supply. The Blueprint intends to overcome this gap by enhancing training needs detection and by thoroughly adapting the current training offer. A sustainable impact within the construction industry and its organisations is ensured by the presence of the most relevant sectorial organisations and VET providers at regional, national and European level.

Project No. 60885-EPP-1-2018-1-ES-EPPKA2-SSA-B

Sector: Construction

Lead organisation:

Fundación Laboral de la Construcción (ES)

EU Grant:
€ 4.000.000

Duration:
2019 to 2022

Partners:
24

Countries:
12
