Policy/Initiative Data	
Title of Initiative	Development of VET Training on Energy Efficient Stoves and Fireplaces – ENEFFIS
Partnership details	Promoter: Viešoji įstaiga Vilniaus statybininkų rengimo centras - Partners: Krosnių meistrų gildija, MTÜ Kütte- ja Ventilatsioonisüsteemide Teabekeskus, Wolfshöher Tonwerke GmbH & Co. KG, Satakunnan koulutuskuntayhtymä
Project Duration	01.09.2016 to 28.02.2019
Total Budget	€159,097.00
Description	Initiative addressed towards the development of an innovative course on energy efficient stove building to empower the stove builders with a new set of skills and competences. The project ENEFFIS addresses the need to promote environmentally friendly and energy efficient stove building by developing a common European qualification standard and training curriculum for initial and continuous vocational education and training.
Phases	n/a

Project Details	
Aim	The main aim is to develop the innovative course on energy efficient stove building to empower the stove builders with a new set of skills and competences, with regard to principles and technologies related to the designing and building of energy efficient and green stoves and fireplaces fired by solid fuel.
Target groups	VET trainers that deliver courses for IVET or CVET students; Trainees enrolled in IVET and CVET programmes for stove builders; Unemployed people seeking to acquire the qualification of a stove builder; Bricklayers and stove builders seeking to improve and update their competence and qualification.
Exchange of Experiences	
Outcomes 1	Development of an updated Occupational Qualification Standard for stove and fireplace builders, accompanied by a modern curriculum and training/learning materials.
Outcomes 2	Establishing a Qualification Scheme to ensure transparency and accessibility in competence acquirement, assessment, validation and certification.
Outcomes 3	Delivering recommendations for normative documents on energy efficient and environmentally friendly stove building.
Policy/Initiative	
Skill gaps	n/a
Mis-matching of skills	n/a
Skills-Shortages	The project's outputs are focused on the target group whose needs have not been previously addressed in relation to VET provision in energy efficient stove building, namely IVET trainers and trainees. The project complies with the EU2020 framework by developing an up-to-date VET tools for stove builders training ensuring the matching of labour market with skill requirements in resource efficiency technologies. Developing skills in environmental technologies also supports the Paris Climate Deal, the EU policies such as "Vocational education and training for better skills growth and jobs" and "The Agenda for New Skills and Jobs".
Training	The Occupational Standard of a stove builder and accompanying curricula were developed taking into account the New priorities for European cooperation in education and training (Education and Training Strategy 2020), thus supporting the strategic objective of improving of quality and efficiency in education and training systems in order to strengthen the anticipation of skills needs for the labour market. In this way the ENEFFIS outcomes offer a good basis for the development of the national VET standards and other related documentation.
